

How Do I Build an Emergency Fund?

1

Open a dedicated savings account, separate from your everyday checking, that's easy to access when emergencies arise.

2

Set small savings goals and work your way to saving 3-6 months of expenses.

3

Identify non-essential spending (like subscriptions or eating out) and redirect that money into your emergency fund instead.

4

Set up automatic transfers from your checking to your emergency savings account and avoid non-emergency withdrawals.
